PROFESSIONAL SUMMARY

Full-stack developer with 3+ years of hands-on experience designing and building complete web and desktop systems for organizations from multi-tenant SaaS platforms and role-based management systems to POS and inventory applications. Comfortable across the stack with Laravel, Vue.js, React, and MySQL, with a strong focus on database design, access control, and practical, secure solutions. Adaptable, self-driven, and committed to delivering quality work.

TECHNICAL SKILLS

Frontend: HTML5 · CSS3 · JavaScript · React · Next.js · TypeScript · Vue.js · Inertia.js · Tailwind CSS

Backend: Spring Boot · PHP · Laravel · Node.js · Express

Database: MySQL · SQLite · MongoDB

Desktop: Java · JavaFX · Electron

IoT & Hardware: Arduino · C++

Tools: Vite · Composer · NPM · XAMPP · Git · Figma

Deployment: Vercel · Render

PROJECT EXPERIENCE

Dental Clinic Management System

FULLSTACK

Laravel 12 · PHP · Stancl Tenancy · Laravel Reverb · Laravel Cashier (Stripe) · Vue.js 3 · Inertia.js · Tailwind CSS · Vite · MySQL

A SaaS Multitenancy Web Application and all-in-one digital platform designed to help dentists and clinic owners run their practices more efficiently. Instead of relying on paper files or multiple disconnected tools, our system brings everything into one secure place.

- **Effortless Organization:** Manage patient records, medical histories, and treatment plans with just a few clicks.
- **Smart Scheduling:** A built-in calendar helps you organize appointments, while a dedicated website for your clinic allows patients to book their own visits online.
- **Simple Billing:** Track payments, manage subscriptions, and handle clinic finances without the headache of manual bookkeeping.
- **Professional Branding:** Each clinic gets its own private, branded space, giving your practice a modern and professional digital presence.

MINI Library Management System

FULLSTACK

Laravel 11 · Laravel Breeze · Tailwind CSS · DaisyUI · Alpine.js · SweetAlert2 · Eloquent ORM · MySQL

The MINI Library Management System is a user-friendly digital platform designed to help schools and libraries easily organize their book collections and manage student records. It features an attractive online catalog for students to browse while providing administrators with simple tools to track book loans and automatically calculate late fees.

- **Attractive Online Catalog:** Students can browse and search for books easily.
- **Loan Tracking:** Tools for administrators to track book loans and returns.
- **Late Fee Calculation:** Automatically calculate fees for overdue books.
- **Student Records:** Manage student data and borrowing history.

Building a Robotic Arm Using Potentiometers, Servos, and Arduino

IOT

Arduino · Potentiometers · Servos · C++ · Robotics

A collaborative group project focused on designing and constructing a robotic arm that mimics human movements. This hands-on experience involved programming Arduino to control servos using potentiometers, integrating sensors and actuators to create a functional robotic prototype.

- **Human-like Movement Mimicry:** Precisely controls the arm using potentiometer inputs.
- **Sensor Integration:** Real-time feedback and control for servo actuators.
- **Educational Prototype:** Designed as a learning tool for robotics and electronics.
- **Collaborative Design:** Built through group teamwork and technical problem-solving.

Junkshop POS System

DESKTOP

Electron · React · Laravel · PHP · Node.js · SQLite · Tailwind CSS · Vite

Desktop POS and inventory management system for junkshop businesses.

- Inventory management
- POS
- Sales reports

EDUCATION

Bukidnon State University

Malaybalay City, Bukidnon

Bachelor of Science in Information Technology

CERTIFICATIONS & ACHIEVEMENTS

Level 4 (Proficient) Certification - 14th TOPCIT Philippines

July 23, 2026

TOPCIT Philippines / Bukidnon State University

One of only five Bukidnon State University BSIT students to reach the Proficient level, among 164 BukSU examinees.
